

Rodent Home-Cage Sleep Fragmentation Platform

Fewer confounds. Better results. More affordable.

Bring your sleep restriction studies into the 21st century with Rewire Neuroscience's *Sleep Fragmentation Platform*. Our innovative system is proven to produce better sleep restriction results, with fewer environmental confounds, while eliminating extra equipment cleaning. Rewire Neuroscience improves the quality of data collection by utilizing vibration and linearly-cycling disruption into the home chamber.

Features like **network compatibility, remote login, easy customizability, and reduced EEG interference**, make Rewire Neuroscience's *Sleep Fragmentation Platform* the smart choice for your sleep restriction experiments.

Applications and Advantages

- Designed to eliminate sources of EEG interference
- Reduces environmental disruption for the rodent
- Employs vibration and linearly-cycling disruption to create continual physical disruption
- Integrated technologies such as WiFi, Bluetooth, and remote login
- **Better results at an accessible price**
