

Degrees of Freedom Equipment Monitoring Systems

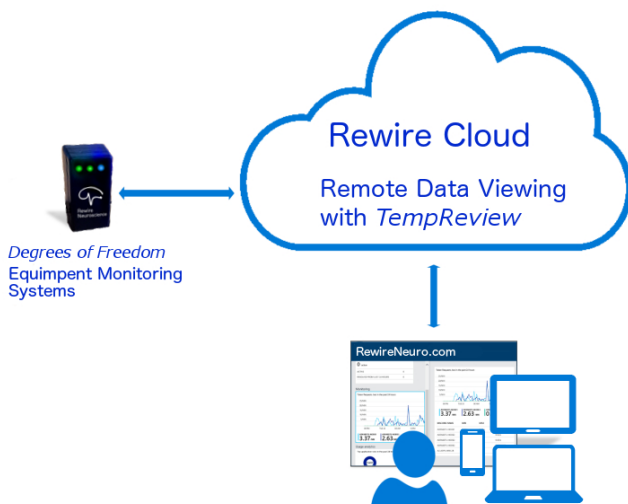

Keep your hard work and valuable samples safe

The integrity of your samples and reagents is vitally important to the success of your lab. Protect your investment with Rewire Neuroscience's *Degrees of Freedom* Equipment Monitoring Systems. Our innovative technology simplifies setup and monitoring of your refrigerators, freezers, and extreme-cold freezers, at an accessible price. The *RewireCloud* connects you with email and text alerts of power outages and freezer malfunctions.

Features like **easy network compatibility, remote login, TempReview, and mobile alerts**, make Rewire Neuroscience's *Degrees of Freedom* Equipment Monitoring Systems the smart choice for cold storage security.

Applications and Advantages

- Know immediately when there is a problem so you can save your samples
- *TempReview*– login and review temp data, even while the power was out
- Easy setup– no need for the IT guy
- Customizable temperature thresholds for refrigerators, freezers, and -80° freezers
- Integrated technologies such as remote login, Bluetooth, and email and text alerts
- **Peace of mind at an accessible price**
